### PTZOptics.com webpages

1. [Getting Started with the PTZOptics Move 4K](#): I created this webpage with Elementor. This page was a request from our product team to get our customers the information they needed when first setting up their Move 4K camera, and it includes instructional videos as well as links to useful files for setup.
2. [MiniTrack 4K Pro product page](#): I created this webpage with a combination of Advanced Custom Fields, Anywhere Elementor templates, HTML, and PHP. This page is for one of our latest products, and contains all the information a customer would need about the product, including technical specifications, documentation, pricing, value propositions, and product images.
3. [PTZControl Pro 2 app](#): I created this webpage with Elementor. This webpage is for our latest camera control mobile application, PTZControl Pro 2. It highlights the app's features, a promotional video, a download link, and testimonials.
4. [The SimplTrack Family](#): I created this webpage with Elementor. This webpage serves to highlight the SimplTrack family of auto-tracking cameras, and lets customers know what the primary differences are between each model, as well as including links for each camera's individual product page.

### HuddleCamHD.com webpages

1. [Support Utilities](#): I created this webpage with Elementor. This page provides links and descriptions for useful applications, software, and documents to use with HuddleCamHD products.
2. [HuddleCamHD @ InfoComm2022](#): I created this webpage with Elementor. This page serves to let customers know of our presence at the InfoComm A/V technology expo, including our booth location, event info, and what customers can expect to see from our team at the event.
3. [See our Products in Action](#): I created this webpage with Elementor and HTML. This is a simple landing page where customers can register for a live product demonstration with one of our team members.
4. [SimplTrack Lite](#): I created this webpage with a combination of Advanced Custom Fields, Anywhere Elementor templates, HTML, and PHP. This page is for one of our latest products, and contains all the information a customer would need about the product, including technical specifications, documentation, pricing, value propositions, and product images.
